Joelle, - FYI & file update

I spoke with Dan Gross this morning at 435-789-7644 regarding the Golden Rule Special SMO. I thought his information may be useful in closing out the file.

Dan said they had last worked at this site around 1990. The work they did consisted of doing some testing by renting a trommel and running some materials through it for about a month. They put the material back where it came from. They worked in an area which had previously been disturbed. They picked up the last few years of the State lease from someone else who had been working the area. When they began their project there was a lot of disturbance in the area, some junk, and equipment. It has been so long ago that he does not remember specifically what equipment was on the site before they came in. After 1990 he believes someone else worked at the site.

I told him I would check with State lands regarding the old lease and any new leases. I asked him to give me a call in a few weeks so I can update him on the file status. He is often out of town and does not have another phone number or message service.
